

1024px - **Navigation:** Context-aware sidebar + top navigation bar

2. User Experience by Role

2.1 Merchant (Service Provider)

Core Needs: Service listing management, client communication, revenue tracking

Frontend Experience:

- **Dashboard:** mermaid graph TD A[Merchant Dashboard] --> B[Revenue Overview] A --> C[Active Projects] A --> D[Performance Analytics] A --> E[Client Messages] A --> F[Service Listings]
- **Key Features:**
 - Revenue chart with weekly/monthly projections
 - Project timeline with milestone tracking
 - Quick stats (response rate, completion rate)
 - Service listing management (edit, pause, archive)
 - Client communication hub (chat, video calls)
 - Rating & review management dashboard
- **Design Elements:**
 - Data visualization cards
 - Portfolio showcase galleries
 - Availability calendar
 - Performance benchmarking graphs
 - Quick action buttons for common tasks

2.2 Admin (Platform Administrator)

Core Needs: User management, content moderation, system oversight

Frontend Experience:

- **Control Panel:**
 - System health dashboard
 - User activity monitoring
 - Dispute resolution queue
 - Revenue analytics
 - Content moderation tools
- **Key Features:**
 - User search with advanced filters
 - Role assignment interface
 - Transaction audit logs
 - Automated moderation alerts
 - Platform-wide analytics
 - Access control management
- **Design Elements:**
 - Dark mode support for extended monitoring
 - Real-time notification system
 - Bulk action tools
 - Alert management interface
 - System configuration panel

2.3 Normal User (Explorer/Visitor)

Core Needs: Browse services, discover providers, research options

Frontend Experience:

- **Discovery Portal:** mermaid graph LR A[Homepage] --> B[Trending Services] A --> C[Skill Categories] A --> D[Success Stories] A --> E[Pricing Guides]
- **Key Features:**
 - Interactive service discovery
 - Advanced search with filters
 - Service comparison tools
 - Provider profile previews
 - Pricing transparency indicators
 - Educational content hub
- **Design Elements:**
 - Immersive hero sections
 - Category landing pages
 - Interactive service cards
 - Hover effects with quick actions
 - Social proof indicators
 - Progressively detailed content

2.4 Premium Buyer (Premium Account Holder)

Core Needs: Project management, premium support, exclusive features

Frontend Experience:

- **Premium Dashboard:**
 - Project management workspace
 - Priority support requests
 - Exclusive service listings
 - Contract management
 - Budget tracking tools
 - Team collaboration features
- **Key Features:**
 - Gantt chart project timelines
 - Escrow payment management
 - Milestone approval workflow
 - Premium provider matching
 - Dedicated support channel
 - Custom reporting tools
- **Design Elements:**
 - Gradient accent elements
 - Premium status badges
 - Advanced filtering options
 - Interactive project boards
 - Customizable dashboard widgets
 - Priority indicators

2.5 Advertiser

Core Needs: Campaign management, audience targeting, performance analytics

Frontend Experience:

- **Advertising Hub:** mermaid graph TD A[Advertiser Dashboard] --> B[Campaign Overview] A --> C[Audience Insights] A --> D[Performance Metrics] A --> E[Budget Management] A --> F[Creative Studio]
- **Key Features:**
 - Campaign creation wizard
 - Audience targeting interface
 - Real-time performance dashboard
 - Budget allocation tools
 - Creative asset management
 - A/B testing capabilities
- **Design Elements:**
 - Data-rich visualizations
 - Audience segmentation interfaces
 - Performance trend charts
 - Budget allocation pie charts

Creative preview panels - Conversion tracking dashboards ### 2.6 System User (Implicit)

****Core Needs:**** Seamless interaction across all roles, consistent experience ****Frontend Experience:**** - ****Global Components:**** - Unified authentication flow - Responsive navigation - Notification center - Settings management - Help documentation - Accessibility controls ## 3.

Frontend Requirements by Feature Area ### 3.1 Authentication & Onboarding

****Requirements:**** - Multi-step registration with role selection - Social login integration - Email verification flow - Profile completion wizard - Role-specific onboarding tours - Password management tools ****UI Elements:**** - Progress indicators - Role selection cards - Interactive tutorials - Profile setup checklists ### 3.2 Search & Discovery ****Requirements:**** - AI-powered search suggestions - Advanced filter system - Saved searches - Category browsing - Skill taxonomy - Geographic targeting ****UI Elements:**** - Search autocomplete - Filter sidebar - Results pagination - Sort options - View toggles (list/grid) - Search history ### 3.3 Service Listings ****Requirements:**** - Rich media support - Pricing display options - Provider profiles - Review system - Service packages - Availability indicators ****UI Elements:**** - Service cards - Image galleries - Video previews - Pricing calculators - Review snippets - Trust badges ### 3.4 Communication Hub ****Requirements:**** - Real-time messaging - Video calls - File sharing - Project boards - Notification system - Message templates ****UI Elements:**** - Chat interface - Video call controls - File transfer area - Message status indicators - Typing indicators - Reaction emojis ### 3.5 Payment & Transactions ****Requirements:**** - Multiple payment methods - Escrow system - Invoice management - Transaction history - Budget tracking - Tax documentation ****UI Elements:**** - Payment forms - Transaction tables - Status badges - Receipt generators - Budget progress bars - Tax document viewers ### 3.6 Analytics & Reporting ****Requirements:**** - Performance dashboards - Custom reports - Data export - Trend analysis - Benchmarking - Goal tracking ****UI Elements:**** - Chart widgets - Data tables - Export buttons - Date range selectors - KPI cards - Comparison views ## 4. Technical Requirements ### 4.1 Performance - Core Web Vitals: LCP <2.5s, FID <100ms, CLS <0.1 - Bundle size: <500KB (initial load) - Image optimization: WebP format, lazy loading - Code splitting: Route-based - Cache strategy: Service Worker implementation ### 4.2 Accessibility - WCAG 2.1 AA compliance - ARIA labels for interactive elements - Keyboard navigation support - Screen reader compatibility - High contrast mode - Text size adjustment ### 4.3 Responsiveness - Mobile-first design approach - Touch-optimized interactions - Adaptive layouts - Breakpoint-specific features - Device-specific optimizations ### 4.4 Security - HTTPS enforcement - XSS protection - CSRF tokens - Content Security Policy - Secure storage (localStorage encryption) - Audit logging ## 5. Interaction Patterns ### 5.1 Micro-interactions - Button hover states - Loading animations - Success/error states - Form validation feedback - Transition effects - Notification animations ### 5.2 Navigation Patterns - Context-aware breadcrumbs - Quick action menus - Keyboard shortcuts - Search-as-you-type - Predictive navigation - Location indicators ### 5.3 Feedback Systems - Toast notifications - Progress indicators - Confirmation dialogs - Error recovery - Success celebrations - Status updates ## 6. Design Deliverables ### 6.1 UI Components - Button system - Form elements - Card layouts - Navigation patterns - Data visualizations - Icon library ### 6.2 Page Templates - Homepage - Dashboard (role-specific) - Search results - Service details - User profiles - Settings pages ### 6.3 Design Assets - Style guide - Component library - Icon set - Illustration system - Photography guidelines - Motion design

principles ## 7. Testing & Validation ### 7.1 Usability Testing - Role-based user testing - A/B testing for key flows - Accessibility audits - Performance monitoring - User feedback collection ### 7.2 Cross-browser Compatibility - Chrome (latest) - Firefox (latest) - Safari (latest) - Edge (latest) - Mobile browsers ### 7.3 Responsive Testing - Viewport testing - Device emulation - Touch interaction validation - Layout verification - Performance optimization ## 8. Implementation Roadmap ### Phase 1: Foundation - Design system development - Core component library - Authentication flow - Basic navigation structure ### Phase 2: Core Features - Search & discovery - Service listings - Basic profiles - User flows ### Phase 3: Role-specific Experiences - Merchant dashboard - Admin panel - Premium features - Advertising hub ### Phase 4: Advanced Features - Analytics dashboards - Communication tools - Payment integration - Advanced search ### Phase 5: Optimization - Performance tuning - Accessibility refinement - Cross-browser testing - Documentation ## 9. Success Metrics ### User Experience - Task completion rates - User satisfaction scores - Session duration - Error frequency - Feature adoption ### Technical Performance - Page load times - Core Web Vitals - Error rates - Uptime - Conversion rates ### Business Impact - User retention - Feature usage - Revenue attribution - Support ticket reduction - User acquisition efficiency]]>
